Setting up VPN on Windows Vista

(connecting to vp2.acu.edu.au)

18 February 2008 (Draft Version 1.1)
Setting up VPN on Windows Vista (Business)

Requirements:

1. These instructions are only applicable for a computer that has Windows Vista Business (if you have the Home version you will need to make allowances for it). Note that these instructions contain screen dumps that may not be identical to what you see. Where the screen dump wording and entries are different from what you see on the screen, ensure you use the instructions contained in this document.

2. You may need to have your Windows Vista CDRom available.

Overview of Virtual Private Network

3. VPN is a Virtual Private Network that uses secure connections to enable users to access their network resources securely.

How to Setup a VPN Connection

4. To setup a VPN connection. Click ‘Start’ and right mouse click on ‘Network’.

5. Click ‘Setup a connection or network’ from the left hand menu area of the window.
6. Select Connect to a workplace, click Next.

7. Click Use my Internet connection (VPN).
8. Type in the fields:
   Internet address: vp2.acu.edu.au
   Destination name: ACUVPN2  (The name is just for your reference, it
   will not affect the installation.)
   Select Don’t connect now: just set it up so I can connect later.
   Click Next.

9. Type in your ACU Network login details. This will be the same credentials that
   you use to login into your office computer. Click ‘Create’.
10. Click ‘Close’ to finish setup.

11. VPN connection properties setup

12. Click ‘Connect to a network’ from the left hand menu area of the window
13. Select the VPN connection you just created. Right mouse click and select properties.

14. Click on Security tab.
15. Select Typical(recommended settings) and leave all other options uncheck. Click OK.

**To connect to VPN**

16. Select the VPN connection you just created and click ‘Connect’.
17. Enter your ACU Network username, password and domain in the relevant fields when asked. This will be the same credentials that you use to login into your office computer.

18. Click ‘Connect’. Logon to the network will occur.

**To access network resources, use below proxy setting:**

To access the Internet and library resources,

19. Use the following proxy servers as your browser proxy setting.

   Proxy Server: proxyone.mackillop.acu.edu.au or proxyone.patrick.acu.edu.au

20. To setup the Proxy on your IE browser click on ‘Tools’ | ‘Internet Options…’ | ‘Connections’ and select the VPN connection that you created in ‘Dial-up and Virtual Private Network settings’ box. Click the button ‘Settings’.

21. In the Proxy Server box, tick ‘Use a proxy server for this connection’.

22. In the Address field, type in ‘proxyone.mackillop.acu.edu.au’. In the Port field, type in ‘80’ Click ‘OK’ twice to exit and save.

23. If prompt by a popup window:
   Enter your ACU domain\username & password and click ‘OK’.

   E.g. User name: acustaff\josmith
   Password: 

   C:\Documents and Settings\malaffan\Desktop\Setting up VPN on Windows Vista_v11.doc
To access network share drives:

24. Click Start then Computer

In top field, type in following for your share drive:

Full domain name of the file server follow by your Network login username
E.g. \mak-acusrc.acustaff.acu.edu.au\woau

Remark: No $ sign at the end of map drive statement for St Patrick and Mackillop campuses. For other campuses, add a $ sign at the end of statement.

E.g. \enterprise.acustaff.acu.edu.au\woau$

Press Enter to map to your share drive.

File servers at each campus:

- St Patrick  \acu-sto-bak.acustaff.acu.edu.au
- Mackillop  \mak-acusrc.acustaff.acu.edu.au
- MSM  \nsw-st.acustaff.acu.edu.au
- McAuley  \enterprise.acustaff.acu.edu.au
- Signadou  \sig-data.acustaff.acu.edu.au
- Aquinas  \aqstaff2.acustaff.acu.edu.au
