When prompted for your username, enter it in the following format

- ACU Student, s1234567@acu.edu.au
- ACU Staff, jodoe@acu.edu.au

Follow the steps below to connect a Mac OS X 10.8, 10.7 and 10.6 to Eduroam

1. Choose **eduroam** from the available wireless network as shown below

2. Upon selection of **eduroam**, a dialog box will pop-up asking for **credentials**

- Your **User name** will be the **eduroam identifier** shown (typically your **username** followed by @acu.edu.au. e.g. jodoe@acu.edu.au).
- Your **Password** will be your windows domain password or your email password.
- Click the **Remember this network** check-box, so in future you do not need to re-enter the credentials.
- Click the **Join** button

3. When the **Verify Certificate** dialog box appears, click the **Continue** button.

![Verify Certificate dialog box](image)

4. A Dialog box will pop-up asking to enter **Password** for the Local Account. Upon entering the valid **password**, Click the **Update Settings** button.

   *(Note: Your local account on the Mac must have Administrator privileges. Otherwise, this screen will remain until valid authentication occurs on an account with Administrator rights.)*

5. The **eduroam** wireless network should now be connected as indicated by a **tick** as shown below:
