FACULTY OF HEALTH SCIENCES
AN INTRODUCTION TO THE FACULTY OF HEALTH SCIENCES

The Faculty of Health Sciences at Australian Catholic University prepares highly qualified graduates in the areas of Nursing and Exercise Science. Staff of the Faculty are located in five Schools at four campuses: one School of Nursing in New South Wales, one School of Nursing and Midwifery in each of Queensland and Victoria and one School of Exercise Science in each of New South Wales and Victoria.

The Faculty offers courses that have a focus on health and range from undergraduate to postgraduate programs of study. Many postgraduate courses have been developed in conjunction with hospitals and health fitness agencies in order to meet specific needs of the professions and industry. Some postgraduate units are offered in flexible learning mode by online study.

All students have field and clinical experience that is supervised by specially qualified practitioners. Catholic hospitals and other public, private and specialty organisations, as well as schools and various health and fitness centres, are very involved with preparing for and promoting this valued and essential experience.

The goals of the Faculty are closely linked to and emanate from the mission of the University. The areas of achievement by the Faculty include the key areas of teaching and learning, research and scholarship, community engagement in addition to specific objectives regarding internationalisation, quality and revenue generation. It has well-established procedures for evaluating performance and ensuring quality which involve students and representatives of the various statutory registration authorities and professional organisations, as well as recent graduates and employers.

The Faculty has an increasingly vigorous research program. Students who wish to undertake a research degree would have the opportunity to do so in fields of research mutually arranged by candidates and staff who may supervise them.

If you are enrolling in one of our courses for the first time this year I extend a warm welcome to you. The Faculty endeavours to promote a warm, friendly atmosphere in which students can pursue their studies under well-qualified and enthusiastic staff. We aim to enhance the dignity of each individual and I am sure you will find your studies with the Faculty of Health Sciences a rewarding experience.

Professor Pauline Nugent
Dean, Faculty of Health Sciences
FACULTY OF HEALTH SCIENCES

The lists show family name first, then other names or initials. Abbreviations of religious orders and institutions are shown in small capitals. Next, honours and decorations, and professional abbreviations such as TC, TPC, TSTC (to indicate a teaching qualification), RN, etc (for registered nurses) and various nursing certificates, ending with a comma.

Then come awards from universities, colleges of advanced education, etc with the name of the institution (usually abbreviated) in brackets. In general, the University uses the abbreviation preferred by the Association of Commonwealth Universities, and also follows the Association’s practice in not printing gradations such as Honours, Distinctions, Merit, etc and in omitting a degree subsumed by a higher one from the same institution (e.g. BA MA is shown as MA). Qualifications of this University are followed by (ACU). Memberships and fellowships are shown last.

FACULTY POLICY PERTAINING TO STUDENTS UNDERTAKING HONOURS
(To be read in conjunction with the University Policy on Honours Programs)

1. The Thesis

1.1 Length of the thesis
For Honours degrees the thesis will normally be between 10,000 – 15,000, but not more than 18,000 words in length.

1.2 Composition and structure of the thesis
The thesis will comprise a number of chapters which will be determined by the research method employed.

1.3 Date of submission
The final date for submission of the thesis will normally be by the third Monday in October.

1.4 Submission of the thesis
Before a thesis can be accepted for examination the “Submission of Thesis” form (Attachment A) is to be completed by the student. The student’s principal supervisor is to complete the “Supervisor’s Report” form (Attachment B).

1.5 Presentation of the thesis for examination
The student is required to submit for examination three copies of the thesis bound in a temporary form. A copy will be sent to each examiner while the third copy will be retained by the relevant Head of School.

2. Examiners and Examination of the Thesis

2.1 Examiners
For Honours theses there will normally be two examiners appointed, one internal and one external. In exceptional circumstances, two internal or two external examiners may be appointed. A third examiner may be appointed at the discretion of the School Committee.

2.2 Appointment of examiners
Examiners will be appointed by the relevant Head of School and after recommendations by the principal supervisor.

2.3 Criteria for selection of examiners
In selecting suitable examiners the Head of School should consider the potential examiner’s:
(a) knowledge of the subject area of the thesis;
(b) knowledge of the research method used;
(c) qualifications. (Examiners of Honours theses are to hold at least a Master’s level qualification or be able to demonstrate equivalent academic ability).

2.4 Student input into the appointment of examiners
The student may be given opportunity to comment on the list of proposed examiners. The student may not demand or reject the appointment of any particular examiner. Contact with examiners by the student during the examination period is not permitted.

2.5 Communication between examiners
Communication between examiners during the thesis examination period is permitted.

2.6 Criteria for evaluation of an Honours thesis
Attachment C details the criteria to be used by examiners to grade the thesis.

2.7 Presentation of the thesis – post-examination
A student whose thesis passes examination, prior to the award of the degree, is required to ensure that any typographical and grammatical errors identified by the examiners are rectified to the satisfaction of the principal supervisor.

Once the completed thesis has received the approval of the Faculty of Health Sciences, the candidate shall present four copies of the thesis to the University in the form prescribed in the University Research Degrees Regulations.

3. Grading Systems

3.1 Honours Thesis

The examiners shall examine the thesis, assign a grade and a mark within that grade and make separate reports, incorporating a short statement of the reasons for the mark awarded for the thesis, which shall be submitted for consideration by the School Committee responsible for conducting the program. The grade is awarded based only on the document presented for examination and using the following grading system, as per Academic Regulations (See Appendix C)

The final grade for the Honours degree will be calculated on a credit point pro-rata basis for coursework and thesis.

A copy of the full policy including Attachments may be obtained from the Faculty or School upon request.
RECOMMENDED HEALTH PROCEDURES

Undergraduate nursing students will be required during their course to undertake clinical/field education programs at hospitals and other health agencies. They will deal with many people, some of whom may have a communicable disease. This places students at risk of acquiring one of those diseases. Also, a student who has a communicable disease places clients at risk. Immunisation is one of the most effective public health measures for the control of communicable diseases, protecting both the individual and the general community.

For the protection of students and their clients, evidence of vaccination status is required by certain health care agencies prior to attendance. This must be in the form of either a signed Statutory Declaration or documentation from a medical practitioner.

If vaccinations are incomplete, opportunities for clinical/field placement will be limited and progress in the clinical practice program may be affected.

To reduce health risks and to facilitate progress in the clinical/field education program the Faculty of Health Sciences strongly recommends that all students:

(a) have a tuberculin test. If the tuberculin test is negative, a vaccination against tuberculosis is recommended;

(b) be up-to-date in their vaccinations against:
   - diphtheria
   - measles
   - mumps
   - poliomyelitis
   - rubella
   - tetanus

(c) are vaccinated against Hepatitis B.

As health professionals, all students should take responsibility for their own health and ensure that they do not place themselves or others at risk.

The Faculty of Health Sciences requests that students complete a Declaration of Understanding Relating to Health Procedures form, available from the School offices.
