Nursing Simulation Laboratory Session

Week 2
Jane Walton

*Person centered framework - How to recognise what it is we need to know, do & feel? Critical Thinking*

Contextualise: Scenario - Jane Walton

Handover: Jane Walton is a 76 year old woman who was recently hospitalised for a right CVA. Mrs Walton has now been at home for a week and you as the community nurse are visiting her to review how both she and the family are managing her care. Mrs Walton remains on NGT feeds and has become constipated. Jane is becoming increasingly confused and is not responding appropriately to comments made by her family. Her daughter Margaret is concerned as to how they will manage with her at home in the future and wishes to discuss this with you next week.

Establishing the environment:
What competencies do I need to have?
Professional practice
Critical thinking and analysis
Provision and coordination of care
Collaborative and therapeutic practice

Patient intervention:
Activities:
(i) perform a physical assessment including an abdominal assessment
(iii) review the procedure for a PR examination
(iv) Review the types of aperients/enemas available for use and providing reasons for why the particular types of aperients would be used
(v) Complete your nursing documentation

Debriefing:
*Reflect on performance:*
(i) Required knowledge
(ii) Skill acquisition
(iii) Behaviour & Attitudes

Tutorial
The focus of this tutorial is to determine the clinical priorities for the client’s you are seeing today and to pre-plan your strategies for being able to unblock the nasogastric tube.

Workshop - Self directed
Undertake a 4 hour snapshot clinical visit and complete the content of the workbook and the portfolio as part of the self-directed learning time.

Reflect on group discussion.

Skill development:
Practice sessions
