### AUS AID

### DEPARTMENT OF IMMIGRATION AND CITIZENSHIP (DIAC)

### PLEASE NOTE

Whenever you want to scan a QR code, you need to open the QR reader app first, otherwise you will just end up taking a picture.

### QR CODE

Abbreviated from Quick Response Code (QR), a QR code is a mobile phone readable barcode. It lets you encode a web URL (web page) so that you can get to the information you want to read quickly and easily.

So what do you need to do?

You need a smartphone that can access the internet and has a camera.

You also need to install a QR reader app. We recommend QRReader for Apple and RedLaser for Android phones.

How to use the QR Codes

1. Open your QR reader app
2. Place your mobile on top of the code
3. The selected ACU webpage will open.
4. You will be able to do the same thing with any code you find in this booklet. They will all take you to readable barcode. It lets you encode a mobile phone accessible page so that you can get to the information you want to read quickly and easily.
