Bachelor of Inclusive Education and Disability Studies/Associate Degree in Inclusive Education and Disability Studies

Professional Experience Information and Dates

Professional experience units require continuous full-time engagement regardless of the enrolled study mode. Students are required to complete all placements as described, either as individual days or in a sustained block.

The Professional Experience Program (PEP) Office will provide further information about the PEP prior to students commencing the program. Supervised professional experience is at the heart of all our Education courses. Where students elect to undertake a placement in a school, the Faculty will find appropriate placements to suit the needs of your course. Students who elect to undertake a placement in a community organisation are responsible for arranging their own placement, with approval from the Lecturer in Charge or Course Coordinator. Placements will usually be arranged for the scheduled placement period in the professional experience calendar, although this may not always be possible.

Work Integrated Learning

Work Integrated Learning (WIL) includes several Professional Experience Program (PEP) units that will require continuous full-time engagement regardless of the enrolled study mode. Please visit ACU's Work Integrated Learning website

---

Working with Children and Police Checks

All students participating in the Professional Experience Program must obtain background checks as required by Federal and State/Territory laws. Please refer to the Professional and Community Experience webpage for requirements in your local State or Territory.

Organising practicums

The Professional Experience Office will organise practicums. Students are not to make contact with schools directly to organise their own practicums. Students will be placed at a school within 60 minutes travel time from their home address, so it is important that personal details are correct in InPlace.
