## Finding your specialty is our specialty

Advance your career and become a well-rounded management professional with an MBA that puts ethics and sustainability at the forefront.

### OVERVIEW

We understand the importance of learning in the real world, not just in the classroom. Microsoft certifications are built into the degree, so you'll graduate with a strong foundation in the Microsoft programs favoured by employers. All our units are also embedded with the United Nations sustainable goals. And you'll have the opportunity to develop your consulting skills in applied business contexts and engage with international partners through the Global Virtual Classroom. Our courses include opportunities to link with industry and apply your learning to your current job through applied assessment options.

### SPECIALISE YOUR MBA TO MATCH YOUR CAREER PATH

Our unique MBA structure allows you to design your own specialist qualification. The core units will offer you a solid foundation across all business functions, and then you'll be able to choose four open electives to suit your individual professional journey. Choose from electives in specialist areas such as health, education, marketing, human resources or information technology. You can complete your MBA within just one year by applying for open elective credit for any relevant postgraduate study you've undertaken at another institution. And if life gets in the way, you can exit early with a graduate certificate or graduate diploma.

### CAREER OUTCOMES

Graduates are prepared for careers across a wide variety of professions, such as:

- CEO
- CIO
- CFO
- CMO
- general management
- health administration
- educational management
- consulting.

### APPLICATION AND ADMISSION

Prospective students should apply directly on the ACU website. Recognition of prior learning is available. Entry for non-degree holders with extensive professional experience is possible.
